Glass Doors

PBSC provide installation, servicing, technical advice, product selection and demonstrations for clean controlled environments with **Innovation, Design and Quality** at the heart.

PBSC manufacture high quality clean room, high containment and material decontamination products. When you need areas and staff to be contamination free and protected from pathogens, you need dependable equipment which will maintain critical biosafety levels, achieve sterility and protect data reliability.

Complying with local and global regulations **PBSC's** products can be designed to meet your specific requirements. Over 30 years knowledge and competence within the specialist sectors, always going through extensive research and development and offering accurate assistance during project planning to consultants, architects and end users to deliver successful projects.

Innovation

Incorporating your requirements to create product ranges to exceed expectations

Design

Leading the way with pioneering design, ensuring customer requirements are achieved

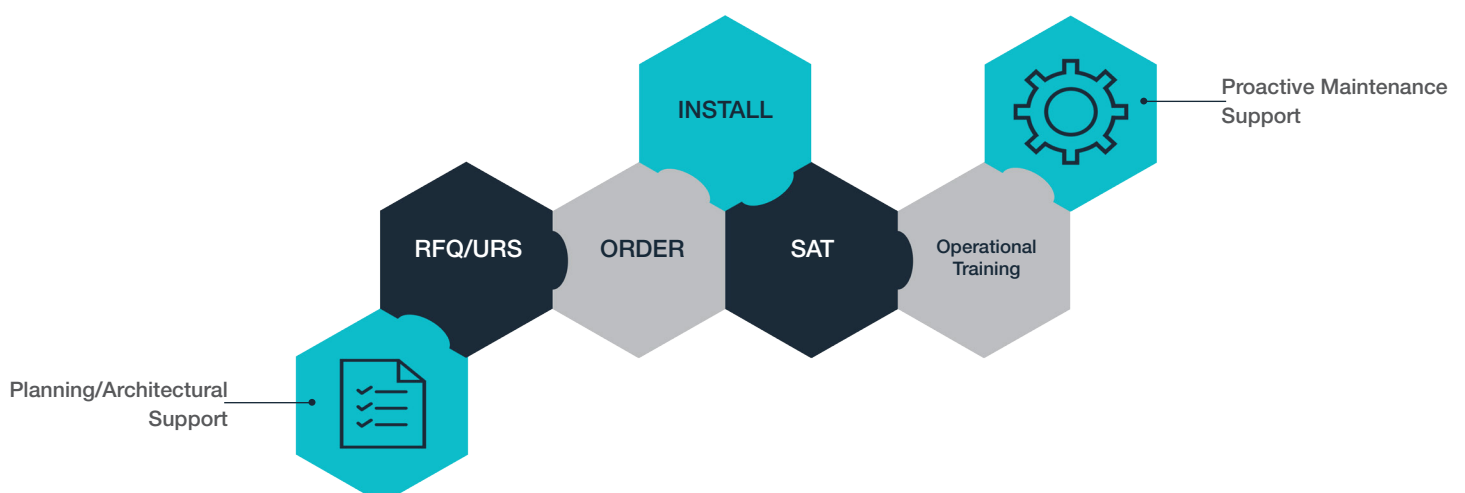

Quality

Delivering high quality products for over 30 years, with rigorous testing and inspection

PBSC is the accepted benchmark by which others are measured...

The search for innovative design, an eye for detail and advanced manufacturing techniques has seen **PBSC** gain a deserved reputation as the premier supplier within cleanroom environments.

Supporting the customer throughout the process continuing to meet the growing challenges and striving for continual improvement with our ISO 9001 QA processes independently audited and updated on a regular basis.

Description

PBSC's cleanroom glass doors incorporate the unique well-known PBSC wrap-around door frame with its clean and sturdy design. The combination of a toughened glass door leaf within the sleek stainless-steel frame will undoubtedly enhance the appearance of your facility while also offering excellent functionality.

The PBSC glass door is a popular choice for many cleanroom applications as it creates an open space feel, which makes the door sets a preferred option for operatives working within the confines of a laboratory environment.

The glass door leaf is made with 10mm toughened tempered glass and is exceptionally robust, providing high levels of impact, scratch, and chemical resistance.

This beautiful laboratory door set offers excellent cleanability with no cavities in the leaf, giving no space for bacterial growth.

Available with the PBSC concealed closer system, which includes a single closer arm made of solid stainless steel and a closer sealed into the door frame, thus removing the ledges created and the difficult-to-clean arms on the conventional surface-mounted closers.

This specialized glass door set is designed specifically for laboratory environments, featuring minimal visible fixings. Available in both single and double-door configurations and can be customized to fit seamlessly into existing walls.

Creating a standout display for a showpiece appearance.

Options

- Single, Double or Leaf & 1/2 Door Options.
- Wide Range of Tints, Screen Prints, Printed Films and, Etched Glass to Suit the Area.
- Flush Maglock for Interlock Systems.
