Classic Steel Door

PBSC provide installation, servicing, technical advice, product selection and demonstrations for clean controlled environments with **Innovation, Design and Quality** at the heart.

PBSC manufacture high quality clean room, high containment and material decontamination products. When you need areas and staff to be contamination free and protected from pathogens, you need dependable equipment which will maintain critical biosafety levels, achieve sterility and protect data reliability.

Complying with local and global regulations PBSC's products can be designed to meet your specific requirements. Over 30 years knowledge and competence within the specialist sectors, always going through extensive research and development and offering accurate assistance during project planning to consultants, architects and end users to deliver successful projects.

Innovation

Incorporating your requirements to create product ranges to exceed expectations

Design

Leading the way with pioneering design, ensuring customer requirements are achieved

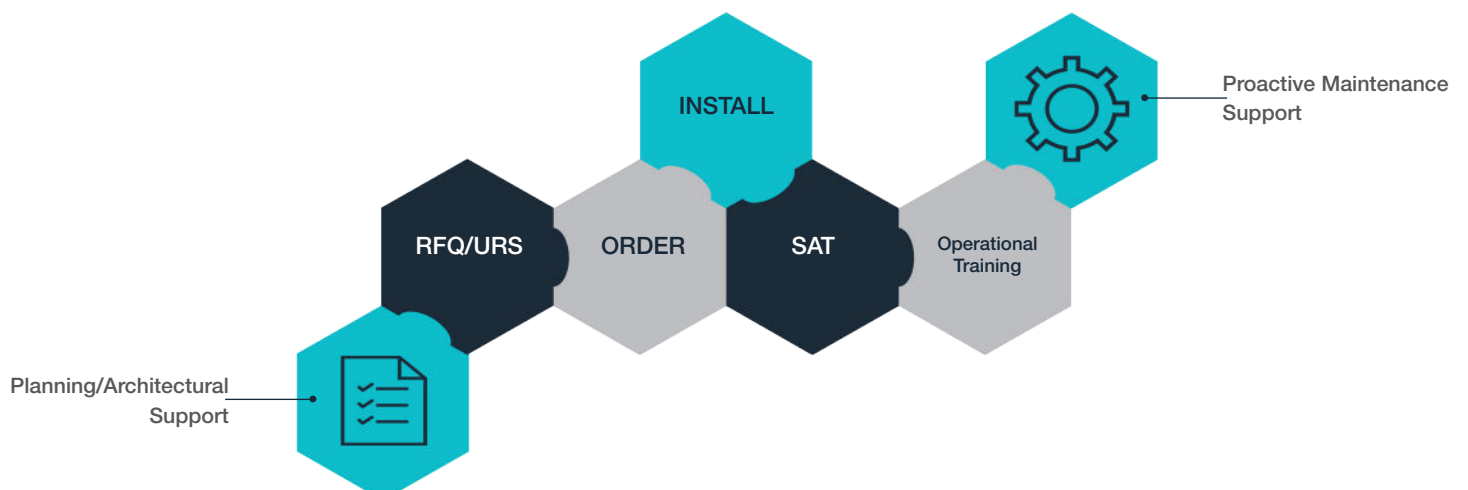

Quality

Delivering high quality products for over 30 years, with rigorous testing and inspection

PBSC is the accepted benchmark by which others are measured...

The search for innovative design, an eye for detail and advanced manufacturing techniques has seen PBSC gain a deserved reputation as the premier supplier within cleanroom environments.

Supporting the customer throughout the process continuing to meet the growing challenges and striving for continual improvement with our ISO 9001 QA processes independently audited and updated on a regular basis.

Description

The Classic Steel door sets from **PBSC** are a sturdy, well-designed steel door system featuring a smooth frame and a vision panel flush with the surface.

It is one of the original **PBSC** door sets specifically developed for the cleanroom environment. It stands the test of time with its precision design and reputation for lasting quality and durability.

Purpose-built for laboratories and medical research facilities. Featuring minimal visible fixings, true flush glazing to both sides of the door leaf, and no rebates or fixings to eliminate possible contamination.

The classic steel door contains the **PBSC** concealed closer system, which accommodates a single solid stainless-steel closer arm and closer sealed into the door frame, eliminating any ledges created.

Customized to fit pre-existing walls and is available in single and double-door options.

Developed for cleanroom and laboratory facilities and is the accepted benchmark by which others are measured...

Options
